

Why iRedMail

Main reasons

with all personal data on hard disk, one can easily control email security or inspect transaction log

no other organization can see the content of messages

Distinguishing Features

System

Open source

All components used in iRedMail are open source software. Bug fixes and updates come from trusted Linux/BSD vendors. iRedMail is the right way to build a mail server with open source software.

Main stream Linux/BSD

iRedMail works on Red Hat Enterprise Linux, CentOS, Debian, Ubuntu, FreeBSD, OpenBSD. Switching operating system to a Linux/BSD distribution supported by iRedMail gives the same setup in just few minutes.

Reproducible deployment

Get a reproducible, easy to use, flexible, stable mail server in just few minutes, easy to migrate an old server, or restore a crashed server to new iRedMail server.

Functionalities

Webmail

Manage mails, folders, sieve filters, vacation directly on an intuitive and easy to use web UI (Roundcube webmail or/and SOGo groupware).

Unlimited Accounts

Most products are with pricing based on number of mailboxes. iRedMail supports creation of as many mail accounts (domains, users, mailing lists, admins) as desired.

Backends

Stores mail accounts in the favourite backend: OpenLDAP, MySQL, MariaDB, PostgreSQL.

Calendars / Contacts / ActiveSync

Manage your calendars (CalDAV), address books (CardDAV), tasks on an easy to use web UI or mobile devices (iOS, Android, BlackBerry 10, Windows Phone).

Security, Control and Support

Secure By Default

End users are forced to use mail services through secure connections (POP3 / IMAP / SMTP over TLS, webmail with HTTPS). Emails are encrypted in transit using TLS if possible. Passwords are stored in SSHA512 or BCrypt (BSD).

Antispam & Antivirus

SpamAssassin, ClamAV, SPF, DKIM, greylisting, whitelisting, blacklisting.
Quarantining detected spam into SQL database for further review.

Web Admin Panel

Manage mail accounts with a web admin panel. iRedMail ships a free and easy to use web admin panel along with it's product.

Professional Tech Support

iRedMail provides backup with fast and professional tech support.
